1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.
2. The following changes to the drawings have been approved by the examiner: Figs. 2, 3A, 3B, 4A-4C should be labelled as --Prior Art--. In order to avoid abandonment of the application, applicant must make these above drawing changes.
3. The following is an examiner's statement of reasons for allowance: the prior art fails to show or fairly suggest a keyed clamp circuit comprising having the combination as claimed, including a clamp circuit, a synchronization signal separation circuit, and a clamp pulse generation circuit generating the clamp pulse for the clamp circuit so that a pulse width of the clamp pulse is shorter, during an equalizing pulse period, than a vertical synchronization signal period, based on the synchronization signal from the synchronization signal separation circuit, as recited in claim 1. Further, the prior art fails to show or fairly suggest a keyed clamp circuit comprising having the combination as claimed, including a clamp circuit, a synchronization signal separation circuit, and a clamp pulse generation circuit generating the clamp pulse for the clamp circuit so that a pulse width of the clamp pulse is shorter than a pulse width of the equalizing pulse during an equalizing pulse period, based on the synchronization signal from the synchronization signal separation circuit, as recited in claim 2. Furthermore, the prior art fails to show or fairly suggest a keyed clamp circuit comprising having the combination as claimed,

including a clamp circuit, a synchronization signal separation circuit, and a clamp pulse generation circuit generating the clamp pulse for the clamp circuit so that a pulse width of the clamp pulse during a vertical synchronization signal period is longer than the pulse width of the clamp pulse during an equalizing pulse period, based on the synchronization signal from the synchronization signal separation circuit, as recited in claim 5.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
